Assemble Instruction

1. Layout the printed image banner on top of a table, and place the plastic adhesive strip (5) on the edge of the top and bottom borders.

2. Fold the edge of printed image banner borders and once folded, insert it through the top and bottom aluminum bars (8).

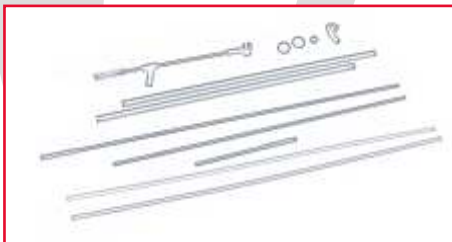

3. Install the Back Support Bar (3) sliding it onto the Aluminum Bottom Bar (8) until it is in the center of the Bar

4. Install the Top Side Hook (4) by sliding it onto the Top Aluminum Bar (8) until it is in the center of the bar.

5. Extend the image banner on top of a flat surface with the printed image facing downwards, and place the Fiber Glass Bars (1) in the back pressing it against them, place the lateral End Caps (6-7) and lift it up.

Nota: Smaller measurement can be obtained by shortening the Fiberglass Bars (1) and Aluminum Bars (8) to desired size. It is not recommended to use PVC substrates over 10oz.
